

SUBSTANCE ABUSE TESTING

PROVIDING AGENCIES WITH HASSLE-FREE DRUG TESTING ALTERNATIVES

Sentinel offers comprehensive, full-service drug testing programs to criminal justice agencies nationwide. Our drug testing programs are designed to ensure participant accountability while remaining drug free and on the path to recovery.

Sentinel's drug testing programs can dramatically impact an agency's cost-effectiveness and overall efficiency by:

- + Removing the burden of urine collection from agency staff
- + Screenings performed by certified Sentinel personnel in our local offices
- + Offering 5-, 6-, and 12-panel drug testing options
- + Providing immediate, initial screening results

When a participant is required to report for testing, they come to our local office where they meet with Sentinel personnel and the participant's identity is confirmed. Each drug screen is performed under full observation by trained, same gender, Sentinel personnel to ensure the validity of the results. Sentinel's drug testing program, along with all of our additional services such as case management and fee collection, can be funded via one of three program models.

The offender funded model is at no cost to the agency and the participants are responsible for paying all testing fees. When a department is working with a population where some of the participants are unable to pay, the agency subsidized program model is the solution. It reduces the agency's financial obligations, only paying for those who are deemed indigent or unable to pay by the Court or agency. Agencies also have the option to fund the programs themselves, leaving the payment and collections process within their full discretion.

To meet the need for substance testing, Sentinel offers a variety of tools that can be used in a program as needed.

URINALYSIS

- + Screens up to 12 different drugs with optional adulteration strips
- + Results in 2 - 5 minutes
- + Provides rapid test results for a wide range of illicit drugs

ORAL SWABS

- + Instant results
- + Can detect very recent drug use
- + Almost impossible to cheat
- + Non evasive for the participant
